

BioCity Turku collaborative research funding call 2022

BioCity Turku opens a call for research funding **for all BioCity Turku research groups**. The funding is intended for new openings promoting research on **emerging topics in molecular life sciences and biomedicine**. Optimally several research groups participates in the project and the project includes interdisciplinary approaches. The funded projects are also encouraged to organize training/lectures, which are open for BioCity Turku researchers and graduate students.

- Grants are maximum 10 000 €. Funding period is July–December 2022. All received funding must be used during 2022.
- Funding is intended for consumables, services and small instruments. Expenses of visiting lecturers can be covered. Grants can be paid in special cases only (when the university rules and guidelines allow it).
- The funding can partially cover costs for purchasing some bigger instrument, but due to depreciation rules (poistot) the full price for one equipment must be under 15 000 € (excl. VAT).
- **Application period is 2–27 May 2022**
- BioCity Turku Research Programs will cross-evaluate the applications and the result will be announced on BioCity Turku web pages www.biocityturku.fi during June 2022.

One-page application as .pdf must include

- Background of the work
- Preliminary actions and budget
- Research groups involved in the project
- Contact person

Send your application latest Friday 27 May 2022 at 16:00 (CET +1) to biocityturku@bioscience.fi
